creative solutions for the sensitive child

Hi, I am Karin de Vos, founder of Nurture House.

10 years ago, my two sons and I were sick, stressed and unable to cope; depression, a break down, ADHD, Aspergers, learning difficulties, and life threatening peanut allergy (anaphylactic), were ruling our lives.

I began searching many different areas for a solution to our myriad of health issues and I found them ! Through understanding that we are

Sensitive, we are now living healthy, happy and harmonious lives. I am now sharing these simple drug free solutions with parents, grandparents and children.

Nurture House has been created to provide sensitive children and their parents with Strategies, Products and Support they are looking for. Our services include guidelines to create the right drug free environment, products that balance their bedroom, a parent phone forum, one on one support and creative play afternoons (see above).
