How To Stop Sabotaging Your Health, Wealth & Self

Saturday October 12th 10am-5pm.

Discover why you sabotage yourself, how you sabotage yourself and how to overcome it in order to live a fearless, fulfilled and generally joyous life.

Nothing affects our adult life nearly so much as our childhood.

Unthinking parental behaviour leads to a myriad of dysfunctional behaviours in the growing child that, by adulthood, are all but invisible.

Most important and critical of these is a desire for unhappiness and poor self-worth.

As incredible as this sounds, most of us have such a desire to one degree or another.

This leads to such things as always putting ourselves last, thinking failure at work, thinking lack at home, thinking that hurt is OK, thinking that relationships must fail, thinking that abuse is normal, thinking that rainbows of happiness are only for other people.

Why on earth would we want to sabotage ourself like this?

Because of confused love, when children, for our parents.

No matter what happened to us, as tiny children we thought it was love....

Cost Just \$95. Pensioners and 'Heartlanders' \$75.

Please bring lunch to share.

Repairing The Net Of Time Sunday October 13th 10am-5pm

Have you ever wondered why you sometimes act irrationally and against your own better judgement?

Many issues that affect us have nothing to do directly with us. Rather, they originate with other members of our family – both living and in spirit.

We inherit their unresolved issues....often for life – at least until now!

In this absolutely 'must be experienced to believe' extraordinary hands-on workshop you will experience deep spiritual resolution of issues.

This amazing metaphysical channelled healing technique, pioneered by Les Dyer over a decade ago and now spreading across the world, allows us to repair and resolve the dysfunction and self-limiting programming given us (usually subconsciously) by older, often deceased, family members.

Cost Just \$95. Pensioners and Heartlanders \$75

Please bring lunch to share.
