## **PRESENTS**

**On Friday 15<sup>th</sup> November 7pm – 10pm**

**At the SMSA Mitchell Theatre, 280 Pitt Street,**

**Sydney. COST: \$20 (including refreshments)**

**SIRIUS** is a 2013 crowd-funded documentary film following the work of Dr Steven M Greer and is based on his book Hidden Truth Forbidden Knowledge.

The Earth has been visited by advanced Inter-Stellar Civilizations that can travel through dimensions faster than the speed of light. They use energy propulsion systems that can bring us to a new era. Humans have also developed these systems but those in power have suppressed them in order to keep us at the mercy of fossil fuels. It is time for you to know....and this documentary will let you in

It features interviews with former government and military officials who claim the US government is covering up the existence of UFOs and extraterrestrial visitation. These witnesses worked in top secret facilities, reverse engineered captured ET craft and in some cases, worked alongside ETs in underground facilities. The film also prominently features the DNA analysis of a 13 cm human

or ET skeleton which died at age 6, known as the Atacama humanoid because it was found in the Atacama desert in northern Chile in 2003. The film was directed by Amardeep Kaleka, an Emmy award winning film director and is narrated by the actor, Thomas Jane.

Dr Greer reveals in the film his struggles to develop advanced energy and propulsion systems. He discusses his CE 5 protocols which involve meditation and other techniques to summon UFOs and to make peaceful contact with ET races. He regularly runs 5 day retreats for this purpose at various locations in the US and Britain.

After the film and the refreshment break, there will be an open discussion on the content of the film including extraterrestrial visitations and the UFO phenomenon and we welcome audience participation.

Tickets can be purchased at the door.
