

# EXCLUSIVE AUSTRALIAN FILM SCREENING

## SOLAR (R)EVOLUTION

**Does the sun have the power to transform humankind?**

**In SOLAR (R)EVOLUTION, world-renowned German biophysicist Dieter Broers makes a compelling case, pointing to a wealth of scientific evidence that shows a remarkable correlation between increases in solar activity and advances in our creative, mental, and spiritual abilities.**

**We are in the midst of a dramatic rise in solar disturbances, which have the capability of disrupting the Earth's geomagnetic field and, as a result, our global ecology. Broers, however, sees this not as an impending apocalypse but as the dawn of a new era.**

**Drawing on research from a variety of disciplines, he shows how erupting solar activity carries the potential to boost our brain capacity and expand our minds in ways we never imagined possible. Abilities now seen as extraordinary or supernatural - telepathy, extrasensory perception, and off-the-charts intelligence quotients - may soon become ordinary and natural and could very well help us solve the mounting global crises we are facing.**

**Without a doubt, the way we think, feel, relate, communicate, and experience reality has been changing dramatically in recent years, and Dieter Broers affirms those changes will ultimately culminate in a new form of consciousness and harmony on Earth. Humankind is going through an evolutionary leap, says Broers, and the process has already begun.**

**Featuring: DIETER BROERS, RUPERT SHELDRAKE, MICHAEL PERSINGER, ERNST SENKOWSKI, MICHAEL KÖNIG, ILLOBRAND VON LUDWIGER, ELIZABETH RAUSCHER, ROLLIN MCCRATY, FRANZ HALBERG, GIULIANA CONFORTO, JJ & DESIREE HURTA, FRANCINE BLAKE, and RICK STRASSMAN.**

*Dieter Broers' film is all the suggestion we need to realize that we have come to the end of our infatuation with the straight line, and are awakening to a virgin appreciation of all it means to be human. I gladly recommend it.*

*~ Barnett Bain, Producer of What Dreams May Come, and The Celestine Prophecy*
