

SACRED CEREMONY of LOVE

ST VALENTINE'S DAY

A Day to Celebrate Love in our Lives

The 14th February is a time that makes us consciously aware of the love in our lives. With powerful energies flowing onto the planet in 2013, now is our opportunity to create new and deeper experiences of love. As the Earth's magnetic field continues to be charged with higher frequencies of Light, we can enter into these powerful healing energies through Sacred Ceremony to attract.....

A Soul mate into your life

Expand our hearts to love ourself more fully

Strengthen family bonds, healing rifts and conflicts

Heal past relationships, or a broken heart from separation or divorce

Renew the commitment of love, intimacy and romance in your current relationship

In looking for a deeper experience of love, Valentine's Day is the perfect opportunity to come together and open our hearts, and connect to the hearts of others for a more profound and richer feeling of love. **During Sacred Ceremony** a powerful and beautiful energy is created within the magnetic field of each individual heart to become one with the Divine. Allowing each of us to draw more Luminous Light into our heart chakra and thus expand the vibration of love in our lives.

Group energy carries everyone to greater heights than can be attained alone.

Saint Valentine was a bishop who was known as '*The protector of lovers*'. He died in Roman on the 14th February AD 269. At this time in Roman the Emperor forced all men to go to war to protect Roman. In doing so he outlawed marriage, believing that the men would fight for longer if not encumbered by wives and children, and the desire to return home to loved ones.

Saint Valentine defied the laws of Roman and married lovers in secrecy. He died protecting the rights of lovers to be married in the eyes of God and the church, and their love forever blessed.
